

Date: 09/20/2018

Position: Senior PHP Symfony3 developer

Contract duration: permanent OR 24 months renewable, from asap

Ipedis is a digital publishing company focused on UX and accessibility. Ipedis is a leader in French Corporate market with top notch brands. Ipedis produces thanks to its cloud based PubliSpeak platform rich-media and immersive corporate reports that readers can interact with any device.

We work on advanced technologies like Angular 6.0 / Symfony3 / Elasticsearch / etc.

Main work:

You will join the core team of a large platform of publications digitalisation, used by biggest French companies. You will work closely with French CTO and learn international coding quality.

The duties of the employee are to perform the following tasks:

- Build strong and evolvable software on complex environment
- Strong analyze and conception
- Realize testing plan
- Micro service development

Your profile: Geek!

- Engineering degree with computer science specialization
- 3+ years of experience in PHP development
- Excellent time management

You must have relevant experience in:

- Framework Symfony2 or Symfony3
- PHP7 in POO (Namespace / abstract / encapsulation / development by contract)
- Strong working knowledge in MySQL
- Development of Restful API
- GIT Protocol (versioning system)
- GulpJS and Webpack

In addition you must master every previous quoted library. You have to make robust and generic code. You know several design patterns (MVC, polymorphism, Factory, interface...). You already have built a custom framework, template generator or strong interface.

Would be a plus – knowledge in:

- Elasticsearch 6
- Angular2+
- RabbitMQ and multi-thread
- NodeJS
- Software security and SEO
- Websocket and concurrence
