---

**Position: Senior UI/JavaScript Front-end developer**

**Contract duration: permanent contract OR 24 months renewable, from asap**

Ipedis is a digital publishing company focused on UX and accessibility. Ipedis is a leader in French Corporate market with top notch brands. Ipedis produces thanks to its cloud based PubliSpeak platform rich-media and immersive corporate reports that readers can interact with any device.

We work on advanced technologies like Angular 6.0 / Symfony3 / Elasticsearch / etc.

**Main work:**

You will join the core team of a large platform of publications digitalisation, used by biggest French companies. You will work closely with French CTO and learn international coding quality.

The duties of the employee are to perform the following tasks:

- Development in HTML5/CSS3/JavaScript
- Development in Angular/NodeJS
- Taking into account best practices in UI/UX
- Follow the best practices for websites and mobile application development
- Participate to enrich internal libraries
- Technology watch / maintenance

**Your profile: Geek!**

- Engineering degree with computer science specialization
- 2+ years of experience in JavaScript development
- Design sensitivity (UX/UI)
- Fond of new technologies and web development
- Excellent time manageme

**You must have relevant experience in:**

- HTML5/CSS3 + SASS
- JavaScript (ES6/ES2015)
- React/ReactJS OR Angular2+
- Cross-browser compatibility (Internet Explorer 11+, Chrome, Firefox, mobile devices)
- GIT Protocol (versioning system)
- GulpJS and Webpack
- Material design

In addition you must master every previous quoted library. You have to make robust and generic code. You know several design patterns (MVC, polymorphism, Factory, interface...). You already have built a custom framework, template generator or strong interface.

**Would be a plus:**

- TypeScript
- OOP
- node.js
- NPM (or other dependency manager)
- Experience in real time application
